25X1	l.	On 13 and 16 August, the west section of the Neue Fuesilier Kaserne on Kopernikus Strasse was occupied by between 800 and 1,000 soldiers. The east section of the installation was occupied by between 600 and 800 Volkspolizei. Six prime movers towing guns of about 152-mm and several 57-mm and 85-mm AT runs were seen in the barracks yard.	*
25X1	*- [Convert. App a cently no changes have taken place at the barracks installation on Ulmenstrasse and the Butlitz Maserne. The installations	
25X1		are still occupied by units of the artillery brigade of the LEXIX Itz Rifle Corps. The occupation strength reported in paragraph 3 of the present report is too high considering the	25X1
25X1		capacity of the installation. The actual strength is believed to be closer to the figure mentioned in paragraph 1. The naval units stationed in the installation probably number between 100 and 500 sailors who had occupied the installation prior to the arrival of the army units. The east section referred toin probably the Fueselier Kaserne and the west section is probably the Putlitz Kaserne. The two barrae's installations form one block which is separated by the road. It is reported for the first time that the Putlitz Kaserne is occupied by rocket launchers.	25X1
